SUMMARY

Python Django is a high-level web framework that simplifies backend development by providing tools for building secure, scalable web applications. It encourages clean design and rapid development. Machine Learning (ML) involves creating algorithms that enable systems to learn from data, identifying patterns, and making decisions or predictions. Combining Django and ML allows developers to integrate intelligent data-driven features into web applications.

EXPERIENCE

Machine Learning Intern

India

MENTOR NESS

EDUCATION

Diploma in Computer Engineering

2020 - Present

[Moulvibazar Polytechnic Institute](#)
